

OXTERIL® 350 VHP

from Evonik Operations GmbH

Bio-decontamination of surfaces and rooms tainted with microorganisms is an essential process in diverse industries. To achieve a sterile and clean environment, „Vaporized Hydrogen Peroxide“ (VHP) is an effective and safe technology that is commonly applied. OXTERIL® 350 VHP is a speciality grade of highly purified hydrogen peroxide that has been formulated for application in VHP process. This product can be used directly with no additional modifications.

OXTERIL® 350 VHP is suitable for the decontamination and sterilization of:

- Dry surfaces of laboratory equipments
- Industrial pharmaceutical isolators
- Biological safety cabinets
- Surgical and laboratory rooms
- Emergency vehicles
- Other enclosed spaces

OXTERIL® 350 VHP

Hydrogen Peroxide; 35% w/w aqueous solution; Biozid Grade
AB599496 | CAS 7722-84-1
